TESTING

Students will begin MAAP testing this week. Testing will begin each morning around 9:30 am, Monday- Friday. To assure that our students perform their best, we are asking for your help. Please make sure that students are well rested, eat a hearty breakfast, on time for school and have their computers fully charge.

Objective: to give educators an objective, unbiased perspective of how effective their instruction is. Standardized testing helps identify the natural aptitudes of individual students. Identifying skill development and progress is made possible by the use of standardized tests.
